

Delhi Public School, Sector-4, Bokaro

Subject: Physics

Class: Grade 11

Time Allowed: 45 minutes

Maximum Marks: 18

General Instructions:

- All questions are compulsory unless stated otherwise.
- Write your Name, Roll Number, and Section clearly at the top.
- Maintain proper presentation and structural neatness in your answers.

Name: _____ Roll Number: _____ Section: _____

Section A: Short Questions

(6 questions • 1 Marks each)

Attempt all questions from this section. Each question carries 1 mark(s).

Q1. Explain the primary function and significance of a critical element in Physics. What are its real-world implications?

[1 Mark]

Easy

Q2. Explain the primary function and significance of a critical element in Physics. What are its real-world implications?

[1 Mark]

Moderate

Q3. Explain the primary function and significance of a critical element in Physics. What are its real-world implications?

[1 Mark]

Challenging

Q4. Explain the primary function and significance of a critical element in Physics. What are its real-world implications?

[1 Mark]

Easy

Q5. Explain the primary function and significance of a critical element in Physics. What are its real-world implications?

[1 Mark]

Moderate

Q6. Explain the primary function and significance of a critical element in Physics. What are its real-world implications?

[1 Mark]

Challenging

Section B: Numerical Problems

(3 questions • 2 Marks each)

Attempt all questions from this section. Each question carries 2 mark(s).

Q7. Solve the following equation or interpret the key layout: Given a system of parameters with input = 45 and efficiency = 80%, calculate the net output value in Physics.

[2 Marks]

Easy

Q8. Solve the following equation or interpret the key layout: Given a system of parameters with input = 45 and efficiency = 80%, calculate the net output value in Physics.

[2 Marks]

Moderate

Q9. Solve the following equation or interpret the key layout: Given a system of parameters with input = 45 and efficiency = 80%, calculate the net output value in Physics.

[2 Marks]

Challenging

Section C: Long Essay Questions

(3 questions • 2 Marks each)

Attempt all questions from this section. Each question carries 2 mark(s).

Q10. Provide a comprehensive critique or analysis regarding current research methodologies used in Physics.

[2 Marks]

Easy

Q11. Provide a comprehensive critique or analysis regarding current research methodologies used in Physics.

[2 Marks]

Moderate

Q12. Provide a comprehensive critique or analysis regarding current research methodologies used in Physics.

[2 Marks]

Challenging
