

Delhi Public School, Sector-4, Bokaro

Subject: Physics

Class: Grade 12

Time Allowed: 45 minutes

Maximum Marks: 4

General Instructions:

- All questions are compulsory unless stated otherwise.
- Write your Name, Roll Number, and Section clearly at the top.
- Maintain proper presentation and structural neatness in your answers.

Name: _____ Roll Number: _____ Section: _____

Section A: Numerical Problems

(4 questions • 1 Marks each)

Attempt all questions from this section. Each question carries 1 mark(s).

- Q1.** Solve the following equation or interpret the key layout: Given a system of parameters with input = 45 and efficiency = 80%, calculate the net output value in Physics.

[1 Mark]

Easy

- Q2.** Solve the following equation or interpret the key layout: Given a system of parameters with input = 45 and efficiency = 80%, calculate the net output value in Physics.

[1 Mark]

Moderate

- Q3.** Solve the following equation or interpret the key layout: Given a system of parameters with input = 45 and efficiency = 80%, calculate the net output value in Physics.

[1 Mark]

Challenging

- Q4.** Solve the following equation or interpret the key layout: Given a system of parameters with input = 45 and efficiency = 80%, calculate the net output value in Physics.

[1 Mark]

Easy
